## Probes

The Terratrip 202 Plus requires one of the following probes:

### WHEEL PROBE

T005

This probe is fitted to 'look' at the bolts holding the brake disc to the hub on a non driven wheel, or a metal flag on the drive shaft

### UNIVERSAL CABLE DRIVE PROBE

T006

This probe fits all cars with a mechanical speedometer cable

### JAPANESE PROBE

T007

This probe is fitted between the gearbox and speedometer cable on many Japanese cars

### DSI (Dual Sensor Interface)

T014

For cars with electronic speed sensors, will also drive two tripmeters from one probe
